

## Welcome!

Hello, and welcome to the second newsletter for the AI-WORK project!

Coming up in this issue, you will find:

- A short overview of the AI-WORK course, now available online.
- Insights from our partners about the development process.

## What is AI-WORK?

The main motivation of AI-WORK is to empower small business owners, particularly those over the age of 50, with the necessary skills and knowledge to effectively leverage Artificial Intelligence (AI) and stay ahead of the competition.

## The People Behind AI-WORK

AI-WORK is being developed by organisations from Romania, Italy and Greece:

- Hapax Ambarino (RO)
- CRSL (IT)
- APOPSI SA (GR)

## AI-WORK Project Update!

### Advancing Our Digital Learning Hub

We are excited to share key developments in the next phase of our Digital Learning Hub, focused on enhancing interactive learning and user experience.

### AI Simulation Environment Now Integrated

A new AI-powered simulation space has been embedded into the hub, giving participants the opportunity to apply AI concepts in realistic, risk-free scenarios. These hands-on simulations support deeper learning, experimentation, and practical problem-solving. You can find out AI Simulation lab at <https://aiworkproject.com/>

### New Forum for Collaboration

To strengthen community engagement, our website now includes a dedicated discussion forum. Participants can exchange ideas, ask questions, share insights, and collaborate across institutions. You can participate in these discussions at <https://aiworkproject.com/community>

A selected group of users is already exploring the platform and providing valuable feedback. Their insights on usability and user experience are guiding our refinements to ensure a smooth, intuitive, and user-friendly final version.

More updates will follow as we move toward the full launch of the Digital Learning Hub.

## Next Steps

As part of preparing for our expansion of the **AI-WORK SME Network**, a European community connecting small business owners, trainers, and digital practitioners, we are planning a final event in Milano during the month of March where we expect both local and international participants. We hope this event will promote ongoing exchange of experiences and best practices, and will invite all learners to join the dialogue on how AI can contribute to sustainable business growth.

Visit [www.aiworkproject.com](http://www.aiworkproject.com) to access the training materials, explore the Hub, and become part of our growing community.
